## TARIFF FORMAT

**A. Page Numbering** - Page numbers appear in the upper right corner of the Page and are numbered sequentially. However, new Pages are occasionally added to the tariff. When a new Page is added between Pages already in effect, a number is added. For example, a Page added between Page 14 and 15 would be 14.1.

**B. Page Revision Numbers** - Revision numbers also appear in the upper right corner of each Page. These numbers are used to determine the most current Page version on file with the NYPSC. For example, the 4th Revised Page 14 cancels the 3rd Revised Page 14. Because of various suspension periods, deferrals, etc. the NYPSC follows in its tariff approval process, the most current Page number on file with the Commission is not always the tariff Page in effect.

**C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

- 2.
- 2.1.
- 2.1.1.
- 2.1.1.A.
- 2.1.1.A.1.
- 2.1.1.A.1.(a).
- 2.1.1.A.1.(a).I.
- 2.1.1.A.1.(a).I.(i).
- 2.1.1.A.1.(a).I.(i).(1).

For this purpose, every month is considered to have thirty (30) days.
- D. Billing of the Customer by the Company will begin on the Service Commencement Date, which is the first day following the date on which the Company notifies the Customer that the service or facility is available for use, except that the Service Commencement Date may be postponed by mutual agreement of the parties, or if the service or facility does not conform to standards set forth in this tariff or the Service Order. Billing accrues through and includes the day that the service, circuit, arrangement or component is discontinued.

A monthly surcharge to recover the additional expense related to the State Gross Income and Gross Earnings Taxes applies to the recurring and nonrecurring rates and charges for all intrastate service except returned check charges, late payment charges and rates for local coin calls. The applicable Gross Revenue Surcharge rates are shown in the Rate Schedule at the end of this tariff. Any changes to these rates will be filed on 15 days' notice to Customers and the Commission, and as directed by the Commission. Whenever the state levies a new tax on the Company's gross revenues, repeals such a tax, or changes the rate of such a tax, the Commission may approve new surcharge factors, and the Company will file a revised rate schedule as directed or approved by the Commission.

The surcharge shall be applicable to bills subject to the tax enactment that are rendered on or after the effective date of the rate schedule. If the tax enactment either ceases to be effective or is modified so as to reduce the tax rate, the surcharge will be changed accordingly within 5 business days.

## SECTION 2.0 - RULES AND REGULATIONS (CONT'D.)

### 2.20 Health Care Providers Support Program

#### 2.20.1 General

The purpose of the Health Care Providers Support Program is to enable public and non-profit rural health care providers to have access to telecommunications services necessary for the provision of health care services at rates comparable to those paid for similar services in urban areas. The Health Care Providers Support Program offers eligible public and non-profit health care providers located in rural areas reduced rates for Company intrastate services, available in this Tariff. Such services must be purchased in accordance with the Rules adopted by the Federal Communications Commission (FCC) in its Universal Service Order 97-157, issued May 8, 1997 and the New York State Public Service Commission in its Order in Cases 94-C-0095 and 28425, issued November 4, 1997. The FCC Rules are codified at 47 Code of Federal Regulation (C.F.R.) 54.601 et. seq., and any amendments made thereto.

#### 2.20.2 Regulations

- A. To be eligible for the reduced rates, rural health care providers are required to comply with the terms and conditions set forth in the FCC Rules.
- B. Reduced rates are available only to the extent that they are funded by the federal universal service fund.
- C. Eligible rural health care providers may aggregate demand with other entities to create a consortium. Universal service support shall apply only to the portion of eligible services used by an eligible health care provider.

---

**SECTION 2.0 - RULES AND REGULATIONS (CONT'D.)**

2. Rural health care providers and consortia shall submit requests for services to the program Administrator, as designated by the FCC, and follow established procedures.
3. Services requested must be used for purposes related to the provision of health care services or instruction that the health care provider is legally authorized to provide under the law.
4. A health care provider that cannot obtain toll free access to an Internet service provider and who is eligible for support for limited toll-free access under the Rules must certify that it lacks toll-free Internet access and that it is an eligible health care provider.
5. Services cannot be sold, resold or transferred in consideration for money or any other thing of value.

**SECTION 2.0 - RULES AND REGULATIONS (CONT'D.)**

**2.20 Health Care Providers Support Program (Cont'd.)**

**2.20.2 Regulations (Cont'd.)**

**E. Responsibility of the Company**

2. The Company shall offer services to eligible rural health care providers and consortia at prices no higher than the highest urban rate as defined in the FCC Order and Rules.
3. In competitive bidding situations, where specific flexible pricing arrangements are allowed, the Company may offer flexible pricing (to determine the reduced rate) subject to New York State Public Service Commission approval.

---

**SECTION 2.0 - RULES AND REGULATIONS (CONT'D.)**

**2.20 Health Care Providers Support Program (Cont'd.)**

**2.20.3 Rates and Charges**

The following price adjustments will be available to eligible rural health care providers, except subparagraph C, which shall be available to all eligible health care providers, regardless of location:

- A.** A reduced rate for telecommunications services, using a bandwidth capacity of up to 1.544 Mbps, not to exceed the highest tariffed or publicly available rate charged to a commercial customer for a similar service provided over the same distance in the nearest city in New York State with a population of at least 50,000.
- B.** An exemption from some mileage charges for any telecommunications services, using a bandwidth capacity of up to 1.544 Mbps, that is necessary for the provision of health care services. The exempted mileage includes the distance between the rural health care provider and the most distant perimeter of the nearest city in New York State with a population of 50,000 or more, less the standard urban distance, which is the maximum average diameter of all cities with population of 50,000 or more in the state.
- C.** Each eligible health care provider that cannot obtain toll-free access to an Internet service provider is entitled to receive toll charge credits for toll charges imposed for connecting to an Internet service provider as per the FCC Rules. Such toll charge credits are available pursuant to applicable toll tariffs.

---

**SECTION 2.0 - RULES AND REGULATIONS (CONT'D.)**

**2.21 Emergency / Crisis / Disaster Restoration and Provisioning - Telecommunications Service Priority**

**2.21.1 General**

- A.** The Telecommunications Service Priority (TSP) Program is a federal program used to identify and prioritize telecommunications services that support national security or emergency preparedness (NS/EP) missions.

NS/EP services are defined as those telecommunications services which are used to maintain a state of readiness or respond to and manage any event or crisis which causes or could cause injury or harm to the population, damage or loss to property, or degrades or threatens the NS/EP posture of the United States.

TSP restoration and/or provisioning shall be provided in accordance with Part 64, Appendix A of the Federal Communications Commission's Rules and Regulations (47 C.F.R.), and the "Service Vendor Handbook For The Telecommunications Service Priority (TSP) Program" and the "Service User Manual for the Telecommunications Service Priority (TSP) System" (NCS Manual 3-1-1) (Service User Manual) issued and updated as necessary by the Office of Priority Telecommunications (OPT) of the National Communications System. Any changes to or reissuance of these regulations or manuals supersede tariff language contained herein.

---

**SECTION 2.0 - RULES AND REGULATIONS (CONT'D.)**

**2.21 Emergency / Crisis / Disaster Restoration and Provisioning - Telecommunications Service Priority (Cont'd.)**

**2.21.1 General (Cont'd.)**

- B.** The TSP program has two components, restoration and provisioning.
1. A restoration priority is applied to new or existing telecommunications services to ensure restoration before any other services during a service outage. TSP restoration priorities must be requested and assigned before a service outage occurs.
  2. A provisioning priority is obtained to facilitate priority installation of new telecommunications services during a service outage. Provisioning on a priority basis becomes necessary when an end-user has an urgent requirement for a new NS/EP service that must be installed immediately or by a specific due date that can be met only by a shorter than standard or expedited Company provisioning time frame. As a matter of general practice, existing TSP services will be restored before provisioning new TSP services.

---

**SECTION 2.0 - RULES AND REGULATIONS (CONT'D.)**

**2.21 Emergency / Crisis / Disaster Restoration and Provisioning - Telecommunications Service Priority (Cont'd.)**

**2.21.2 TSP Request Process**

**A. Restoration**

To request a TSP restoration priority assignment, a prospective TSP user must:

1. Determine that the user's telecommunications service supports an NS/EP function under one of the following four TSP categories.

National Security Leadership  
National Security Posture and U.S. Population Attack Warning  
Public Health, Safety, and Maintenance of Law and Order  
Public Welfare and Maintenance of National Economic Posture

2. Identify the priority level to be requested for the telecommunications service. The priority level is determined by the end-user's TSP category and service profile. The service profile defines the user's level of support to the portion of the telecommunications service that the user owns and operates, such as customer premises equipment or wiring. The five levels of priority and seven element groups that define the service profile are contained in the Service User Manual.
3. Complete the TSP Request for Service Users form (SF 315) available on the National Communications System (NCS) website (<http://tsp.ncs.gov/>).
4. For non-federal users, have their TSP requests approved by a federal agency sponsor. Non-federal users should contact the OPT, at the NCS website (<http://tsp.ncs.gov/>), for information on identifying a sponsor for TSP requests.
5. Submit the SF 315 to the OPT.
6. Upon receipt of the TSP Authorization Code from the OPT, notify the Company, and include the TSP Authorization Code in any service order to the Company requesting restoration of NS/EP services.

---

**SECTION 2.0 - RULES AND REGULATIONS (CONT'D.)**

**2.21 Emergency / Crisis / Disaster Restoration and Provisioning - Telecommunications Service Priority (Cont'd.)**

**2.21.2 TSP Request Process (Cont'd.)**

**B. Provisioning**

To request a TSP provisioning priority assignment, a prospective TSP user must follow the same steps listed in 2.21.2.A above for restoration priority assignment except for the following differences. The user should:

Certify that its telecommunications service is an Emergency service. Emergency services are those that support one of the NS/EP functions listed in 2.21.2.A.1 above and are so critical that they must be provisioned at the earliest possible time, without regard to cost to the user.

Verify that the Company cannot meet the service due date without a TSP assignment.

Obtain approval from the end-user's invocation official to request a provisioning priority. Invocation officials are designated individuals with the authority to request TSP provisioning for a telecommunications service, and include the head or director of a federal agency, commander of a unified/specified military command, chief of a military service, commander of a major military command, or state governor.

---

**SECTION 2.0 - RULES AND REGULATIONS (CONT'D.)**

**2.21 Emergency / Crisis / Disaster Restoration and Provisioning - Telecommunications Service Priority (Cont'd.)**

**2.21.3 Responsibilities of the End-User**

End-users or entities acting on their behalf must perform the following:

- A.** Identify telecommunications services requiring priority.
- B.** Request, justify, and revalidate all priority level assignments. Revalidation must be completed every 2 years, and must be done before expiration of the end-user's TSP Authorization Code(s).
- C.** Accept TSP services by the service due dates.
- D.** Have Customer Premises Equipment (CPE) and Customer Premises Wiring (CPW) available by the requested service due date and ensure (through contractual means or otherwise) priority treatment for CPE and CPW necessary for end-to-end service continuity.
- E.** Pay the Company any authorized costs associated with priority services.
- F.** Report to the Company any failed or unusable services with priority levels.
- G.** Designate a 24-hour point of contact for each TSP request and apprise the OPT.
- H.** Cooperate with the OPT during reconciliation (comparison of NS/EP service information and resolution of any identified discrepancies) and revalidation.

---

**SECTION 2.0 - RULES AND REGULATIONS (CONT'D.)**

**2.21 Emergency / Crisis / Disaster Restoration and Provisioning - Telecommunications Service Priority (Cont'd.)**

**2.21.4 Responsibilities of the Company**

The Company will perform the following:

- A.** Provide TSP service only after receipt of a TSP authorization code.
- B.** Revoke TSP services at the direction of the end-user or OPT.
- C.** Ensure that TSP Program priorities supersede any other telecommunications priority that may be provided (other than control services and order wires).
- D.** Designate a 24-hour point of contact to receive reports of TSP service outages from TSP service users.
- E.** Designate a 24-hour point of contact to coordinate TSP processes with the OPT.
- F.** Confirm completion of TSP service order activity to the OPT.
- G.** Participate in reconciliation of TSP information at the request of the OPT.
- H.** Ensure that all subcontractors complete reconciliation of TSP information with the service vendor.
- I.** Ensure that other carriers supplying underlying facilities are provided information necessary to implement priority treatment of facilities that support NS/EP services.
- J.** Assist in ensuring that priority level assignments of NS/EP services are accurately identified "end-to-end" by providing to subcontractors and interconnecting carriers the restoration priority level assigned to a service.
- K.** Disclose content of the NS/EP TSP database only as may be required by law.
- L.** Comply with regulations and procedures supplemental to and consistent with guidelines issued by the OPT.

**SECTION 2.0 - RULES AND REGULATIONS (CONT'D.)**

**2.21 Emergency / Crisis / Disaster Restoration and Provisioning - Telecommunications Service Priority (Cont'd.)**

**2.21.5 Preemption**

When spare facilities are not available, it may be necessary for the Company to preempt the facilities required to provision or restore a TSP service. When preemption is necessary, non-TSP services may be preempted based on the Company's best judgment. If no suitable spare or non-TSP services are available, the Company may preempt an existing TSP service to restore a TSP service with a higher restoration priority assignment. When preemption is necessary, prior consent of the service user whose service will be preempted is not required; however, the Company will make every reasonable effort to notify the preempted customer of the action to be taken.

## SECTION 2.0 - RULES AND REGULATIONS (CONT'D.)

### 2.22 Caller ID Unblocking

#### 2.22.1 311 / 911 Caller ID Blocking \*

The City of New York 311 Call Center provides consolidated access to non-emergency municipal services and information 24 hours per day, 365 days per year. Callers have the ability to access City departments and services by using the 311 abbreviated dialing code instead of dialing a particular seven-digit number. In certain circumstances, calls to the 311 Call Center involve emergencies of various levels. In these instances, the Call Center will transfer the call to the 911 Emergency Call Center. If the caller has activated Caller ID Blocking, either on a per-call or per-line basis, the 911 Emergency Call Center will be unable to determine the caller's location. Thus, by Order dated April 18, 2003 (Case 03-C00171), the New York Public Service Commission directed that, for reasons of public safety, Caller ID Blocking shall be unblocked on all calls to the 311 Call Center. This ruling applies only to calls made to the 311 Call Center and not to any other municipal office.

#### 2.22.2 211 / 911 Caller ID Unblocking

The City of New York 211 Call Center provides a means of accessing community information and referral services within the Five Boroughs. Callers dialing 211 from telephones located within New York City will reach the Call Center where the calls will be routed to call takers trained to provide basic health and human services information. In certain circumstances, calls to the 211 Call Center may involve emergencies of various levels. In these instances, the Call Center will transfer the call to the 911 Emergency Call Center. If the caller has activated Caller ID Blocking, either on a per-call or per-line basis, the 911 Emergency Call Center operator will be unable to determine the caller's location. By Order dated May 28, 2008 (Case 07-C-1091), the New York Public Service Commission directed that, for reasons of public safety, Caller ID Blocking shall be unblocked on all calls to the 211 Call Center. This ruling applies only to calls to the 211 Call Center and not to any other municipal office.

\* Caller ID Blocking is deactivated for calls to 211 or 311 or 911 in the New York exchange only.

## SECTION 4 - SERVICE CHARGES AND SURCHARGES (CONT'D.)

### 4.4 Carrier Presubscription

#### 4.4.1 General

Carrier Presubscription is a procedure whereby a Customer designates to the Company the carrier that the Customer wishes to be the carrier of choice for intraLATA and interLATA toll calls. Such calls are automatically directed to the designated carrier, without the need to use carrier access codes or additional dialing to direct the call to the designated carrier. Presubscription does not prevent a Customer who has presubscribed to an IntraLATA or InterLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative long distance carrier on a per call basis.

**4.4.2 Presubscription Options** - Customers may select the same carrier or separate carriers for intraLATA and interLATA long distance. The following options for long distance Presubscription are available:

**Option A:** Customer selects the Company as the presubscribed carrier for IntraLATA and InterLATA toll calls subject to presubscription.

**Option B:** Customer may select the Company as the presubscribed carrier for IntraLATA calls subject to presubscription and some other carrier as the presubscribed carrier for interLATA toll calls subject to presubscription.

**Option C:** Customer may select a carrier other than the Company for intraLATA toll calls subject to presubscription and the Company for interLATA toll calls subject to presubscription.

---

## SECTION 4 - SERVICE CHARGES AND SURCHARGES (CONT'D.)

### 4.4 Carrier Presubscription (Cont'd.)

#### 4.4.2 Presubscription Options (Cont'd.)

**Option D:** Customer may select the carrier other than the Company for both intraLATA and interLATA toll calls subject to presubscription

**Option E:** Customer may select two different carriers, neither being the Company for intraLATA and interLATA toll calls. One carrier to be the Customers' primary intraLATA interexchange carrier. The other carrier to be the Customer's primary interLATA interexchange carrier.

**Option F:** Customer may select a carrier other than the Company for no presubscribed carrier for intraLATA toll calls subject to presubscription or which will require the Customer to dial a carrier access code to route all intraLATA toll calls to the carrier of choice for each call.

#### 4.4.3 Rules and Regulations

Customers of record will retain their primary interexchange carrier(s) until they request that their dialing arrangements be changed.

Customers of record or new Customers may select either Options A, B, C, D, E or F for intraLATA Presubscription.

Customers may change their selected Option and/or presubscribed toll carrier at any time subject to charges specified in 4.4.5 below:

---

## SECTION 4 - SERVICE CHARGES AND SURCHARGES (CONT'D.)

### 4.4 Carrier Presubscription (Cont'd.)

#### 4.4.4 Presubscription Procedures

A new Customer will be asked to select intraLATA and interLATA toll carriers at the time the Customer places an order to establish local exchange service with the Company. The Company will process the Customer's order for service. All new Customers' initial requests for intraLATA toll service presubscription shall be provided free of charge.

If a new Customer is unable to make selection at the time the new Customer places an order to establish local exchange service, the Company will read a random listing of all available intraLATA and interLATA carriers to aid the Customer in selection. If selection is still not possible, the Company will inform the Customer that he/she will be given 90 calendar days in which to inform the Company of his/her choice for primary toll carrier(s) free of charge. Until the Customer informs the Company of his/her choice of primary toll carrier, the Customer will not have access to long distance services on a presubscribed basis, but rather will be required to dial a carrier access code to route all toll calls to the carrier(s) of choice. Customers who inform the Company of a choice for toll carrier presubscription within the 90 day period will not be assessed a service charge for the initial Customer request.

Customers of record may initiate a intraLATA or interLATA presubscription change at any time, subject to the charges specified in 4.4.5 below. If a Customer of record inquires of the Company of the carriers available for toll presubscription, the Company will read a random listing of all available intraLATA carriers to aid the Customer in selection.

**SECTION 4 - SERVICE CHARGES AND SURCHARGES (CONT'D.)**

**4.5 Public Telephone Surcharge**

In order to recover Company expenses to comply with the FCC's pay telephone compensation plan effective on October 7, 1997 (FCC 97-371), an undiscountable per call charge is applicable to all intrastate calls that originate from any pay telephone used to access Company provided services. This surcharge, which is in addition to standard tariffed usage charges and any applicable service charges and surcharges associated with service, applies for the use of the instrument used to access Company provided service and is unrelated to the service accessed from the pay telephone.

Pay telephones include coin-operated and coinless phones owned by local telephone companies, independent companies and interexchange carriers. The Public Pay Telephone Surcharge applies to the initial completed call and any reoriginated call (e.g., using the “#” symbol). The Public Pay Telephone Surcharge does not apply to calls placed from pay telephones at which the Customer pays for service by inserting coins during the progress of the call.

Whenever possible, the Public Pay Telephone Surcharge will appear on the same invoice containing the usage charges for the surcharged call. In cases where proper pay telephone coding digits are not transmitted to the Company prior to completion of a call, the Public Pay Telephone Surcharge may be billed on a subsequent invoice after the Company has obtained information from a carrier that the originating station is an eligible pay telephone.

Service is available 24 hours a day, 7 days a week. Service is available where technically feasible and where facilities permit.

#### 5.1.1 Application of Business and Residential Rates

- A. The determination as to whether telephone service should be classified as Business or Residential is based on the character of the use to be made of the service. Service is classified as Business service where the use is primarily or substantially of a business, professional, institutional, or otherwise occupational nature. Where the business use, if any, is incidental and where the major use is of a personal or domestic nature at the person's dwelling, service is classified as Residential service.
- B. Business rates apply at the following locations, among others:
  - 1. In offices, stores and factories, and in quarters occupied by clubs, lodges, fraternal societies, schools, colleges, libraries, hospitals, and other business establishments.
  - 2. In residence locations where the place of residence is in the immediate proximity to a place of business and it is evident that the telephone in the residence is or will be used for business purposes, and in residence locations where an extension is located at a place where business rates would apply.
  - 3. In the residence of a practicing physician, dentist, veterinary, surgeon, or other medical practitioner who has no service at business rates at another location.
  - 4. In any residence location where there is substantial business use of the service and the customer has no service at business rates.

- C. Residence rates apply at the following locations, among others:

**SECTION 5 – LOCAL EXCHANGE SERVICE (CONT'D.)**

**5.1 General (Cont'd.)**

**5.1.2 Charges Based on Duration of Use**

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- A.** Calls are measured in durational increments identified for each service. All calls that are fractions of a measurement increment are rounded-up to the next whole unit.
- B.** Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s). Timing for operator service person-to-person calls start with completion of the connection to the person called or an acceptable substitute, or to the PBX station called.
- C.** Timing terminates on all calls when the calling party hangs up or the Company network receives an off-hook signal from the terminating carrier.
- D.** Calls originating in one time period and terminating in another will be billed in proportion to the rates in effect during different segments of the call.
- E.** All times refer to local time.

## SECTION 5 – LOCAL EXCHANGE SERVICE (CONT'D.)

### 5.1 General (Cont'd.)

#### 5.1.3 Service Terms and Conditions

Local exchange service provides a Customer with a telephonic connection to, and a unique telephone number on, the Company switching network that enables the Customer to:

- a) receive calls from other stations on the public switched telephone network;
- b) access the Company Local Calling Services and other Services as set forth in this tariff;
- c) access interexchange calling services of the Company and of other carriers;
- d) access (at no additional charge) to Company operators and business office for service related assistance;
- e) access toll-free telecommunications services such as 800 NPA; and access toll-free emergency services by dialing 0 or 9-1-1 (where available);

Local exchange service cannot be used to originate calls to caller-paid information services (e.g., 900, 976) provided by other companies. Calls to those numbers and other numbers used for caller-paid information services will be blocked by the Company switch. Each Basic Local Exchange Service corresponds to one or more telephonic communications channels that can be used to place or receive one call at a time.

Individual line local exchange service is comprised of exchange access lines defined as follows:

Exchange Access Line – The service central office line equipment and all the Company plant facilities up to the demarcation point. These facilities are Company-provided and maintained and provide access to and from the telecommunications network for message toll service and for local calling appropriate to the tariffed use offering selected by the Customer.

In addition, the Company reserves the right to review vacant DID stations or stations not in use to determine their utilization. Should the Company determine, based on its own discretion, that there is inefficient number utilization, the Company may reassign the DID numbers.
- D. The Customer has no property right to the telephone number or any other call number destination associated with DID service furnished by the Company, and no right to the continuance of service through any particular end office. The Company reserves the right to change such numbers, or the end office designation associated with such number, or both, assigned to the Customer, where the Company deems it necessary to do so in the conduct of its business.
